

Change Speakers

In the third phase the chair of a conference may have the ability to modify the list of speakers from that conference. Thus the person wishing to do that must have the chair role for that conference.

1. Choose the conference you wish to do your actions in by double clicking

The screenshot shows a web application window titled "flaviu". The main content area is divided into two sections. On the left, there is a "Choose conference" dialog box with a list of conferences. The first item, "First Conference at 2021-06-0", is highlighted, and a black arrow points to it. On the right, there is a "Welcome" section with several input fields and buttons. The input fields are labeled "Enter abstract here:", "Enter paper here:", "Enter title here:", "List of authors:", and "Keywords:". The buttons are "Register as Author", "Register as Listener", "Submit proposal", "View Proposals", and "Logout".

Welcome

Choose conference

First Conference at 2021-06-0

Register as Author

Register as Listener

Enter abstract here:

Enter paper here:

Enter title here:

List of authors:

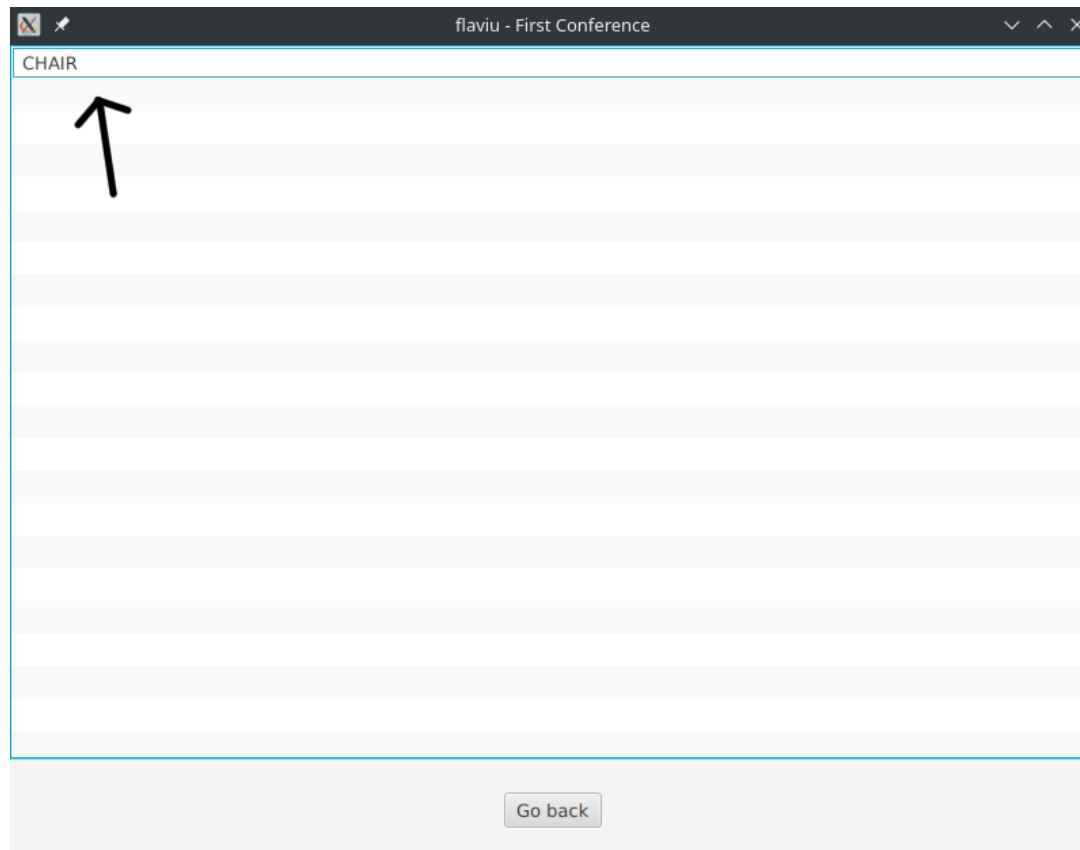

Keywords:

Submit proposal

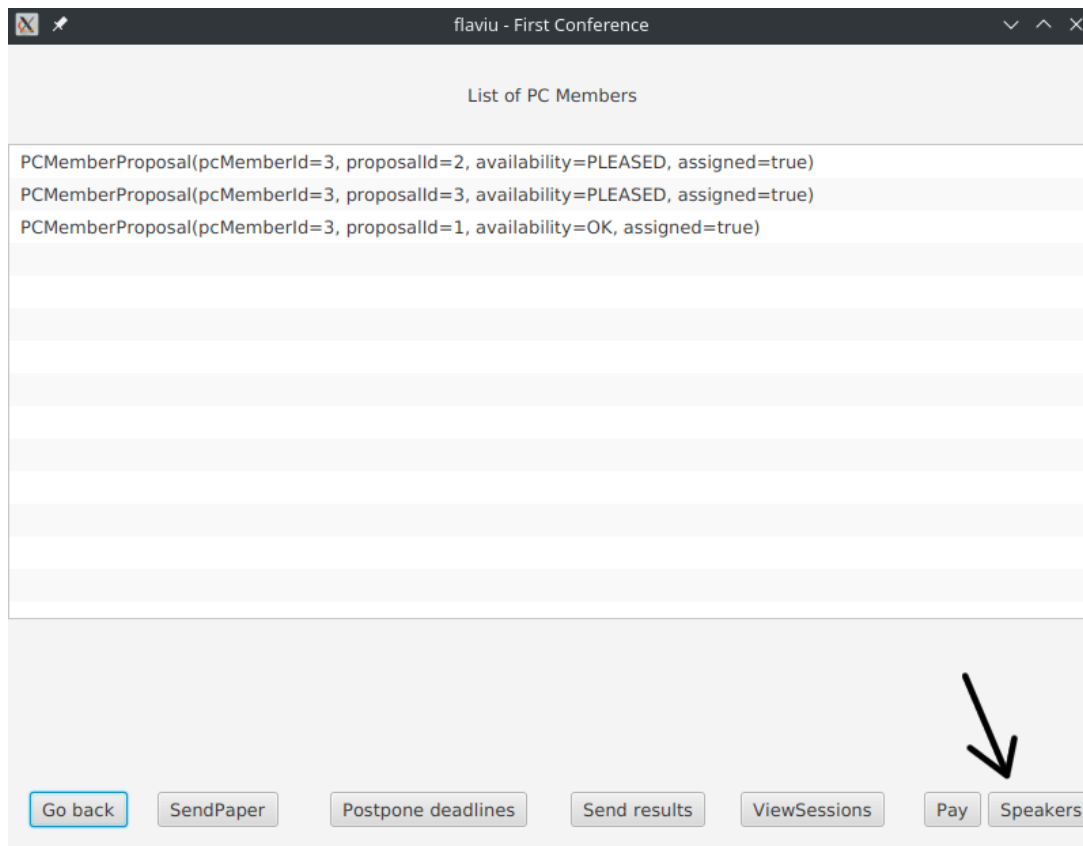

View Proposals

Logout

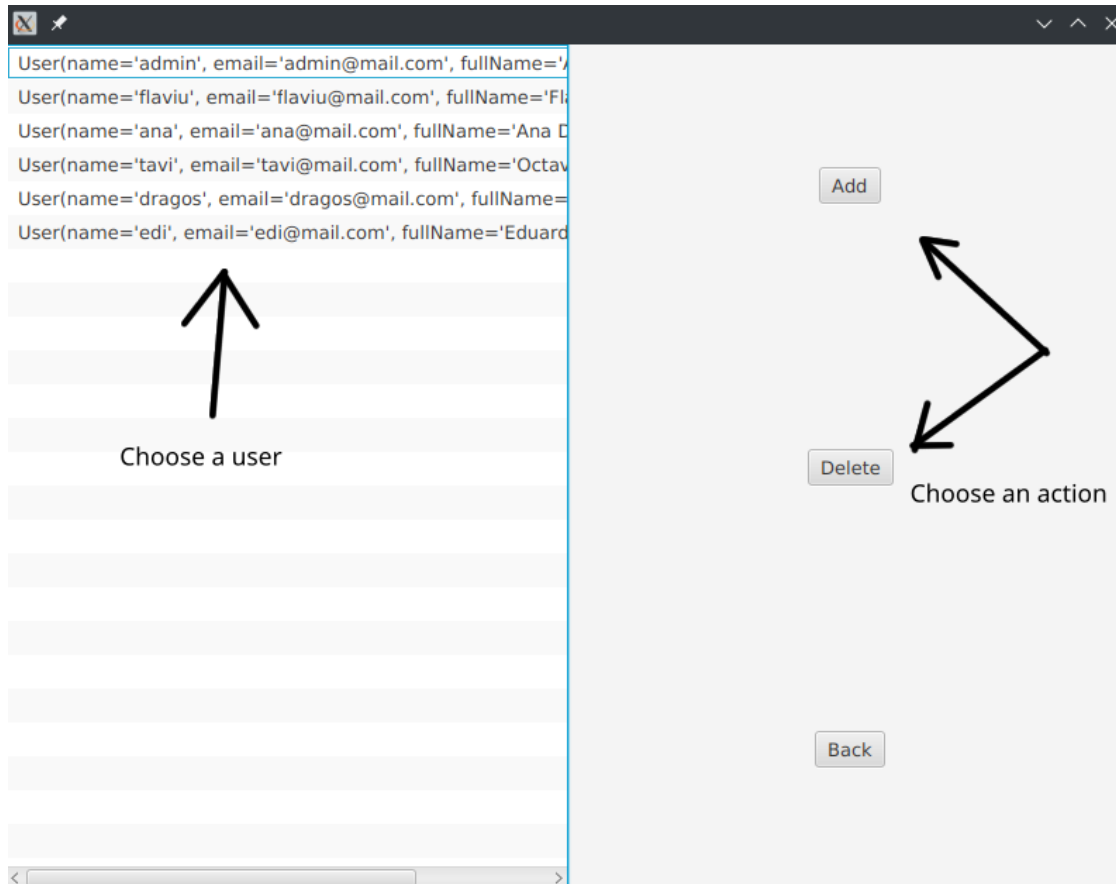

2. Double click again to choose the role of a Chair to act as

3. Click on the speakers button to get to the menu

4. Finally click on which user you wish to make/unmake speaker and finalise your action by clicking on the button

5. Be mindful of the state of the program! The user might already be a speaker or they might not own accepted papers in that conference.
